

Exporting QuickBooks to Employer Portal

How to Export from QuickBooks to Excel then Import to the Employer Portal

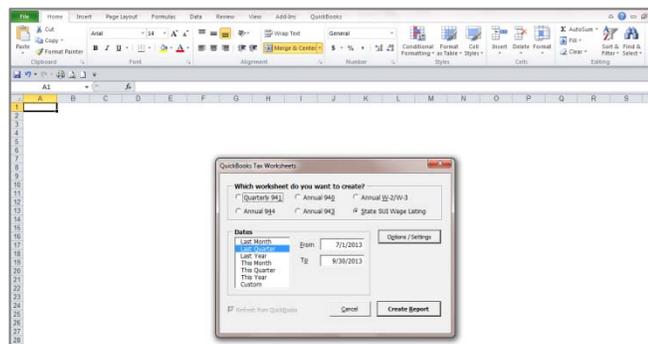

In QuickBooks, go to the top menu bar, then:

- Reports
 - > Employees & Payroll
 - > More Payroll Reports in Excel
 - > Tax Form Worksheets

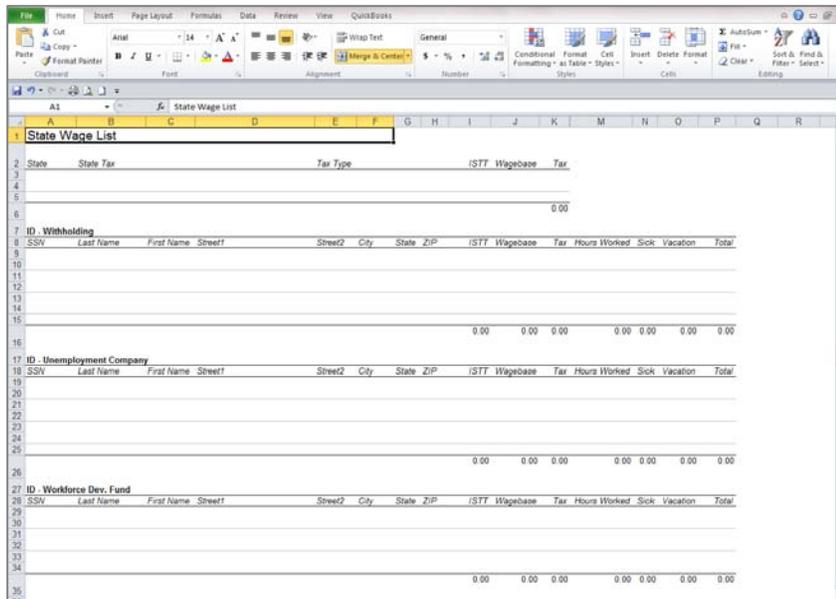

Excel will open. A new screen will pop up and ask “Which worksheet do you want to create?”

- Choose “State SUI Wage Listing.”
- Choose “Last Quarter” or change the dates to the appropriate quarter.
- Click “Create Report.”

Data will export to Excel. The report will include ID-Withholding, ID-Unemployment Company and ID-Workforce Dev. Fund, as shown below.

The only section needed for your SUTA report is ID-Unemployment Company. Highlight the other rows, including the total (rows 1-17 and 26-35 in the example above), right-click and choose “Delete.” Next, highlight columns with extraneous information (columns D-H and J-P in the example above), right-click and choose “Delete.” Your report should now look like the example below:

	A	B	C	D
1	State Wage List			
2	ID - Unemployment Company			
3	SSN	Last Name	First Name	ISTT
4				
5				
6				
7				0.00

Now you will need to edit and add columns and information to complete the wage list for importing.

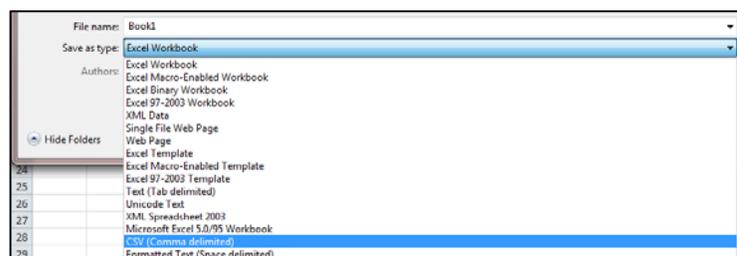

- Right-click the “Last Name” column (column B in the example above); choose “Cut.” Right-click the “ISTT” column; choose “Insert cut cells” to move the Last Name after the First Name.
- Right-click the “SSN” column; choose “Insert.” Label the new column “EAN.”
- Right-click the “First Name” column; choose “Insert.” Label the new column “Employer Name.”

- Right-click the “Last Name” column; choose “Insert.” Label the new column “MI.”
- Right-click the “ISTT” column; choose “Insert.” Label the new column “Year.”
- Right-click the “Year” column; choose “Insert.” Label the new column “Qtr.”
- Rename the “ISTT column “Quarterly Wages.”
- Go to the “EAN” column. Enter the EAN in the first cell. You must include the leading zeros. Enter an apostrophe (') in front of the number to get all 10 digits (including the zeros) to show. Right-click, choose “Copy,” highlight the remaining cells in the column (to the bottom of the data), right-click, choose “Paste.”
 - Repeat for the “Employer Name,” “Qtr,” and “Year” columns.
- Highlight the “SSN” column. Enter Ctrl-H. Enter a dash (-) in the “Find what” box, leave the “Replace with” box blank and click “Replace All.” **If a SSN began with “0,” the “0” will not show.
- Highlight the first two rows, right-click and choose “Delete” (to remove “State Wage List” and “ID-unemployment company”).

Your report should now look like the following example:

	A	B	C	D	E	F	G	H	I
1	EAN	SSN	Employer Name	First Name	MI	Last Name	Qtr	Year	Quarterly Wages
